1 ft vertical - 3 ft horizontal

## GENERAL CONDITIONS AND SUPPLEMENTAL SPECIFICATIONS

FOR

### PERMIT TO CONSTRUCT / ALTER DRIVEWAY WITHIN THE ROAD RIGHT-OF-WAY (OSCEOLA COUNTY ROAD COMMISSION)

(To be used with and attached to Form 200 "Permit to Construct / Alter Driveway within the Road Right-of-way. Form 200 is incomplete without this form 200-A. Not to be used for commercial driveways.)

- 1) A driveway shall be located so that there is no interference with the free movement of highway traffic and sight distance will be assured at all times. In instances where safe sight distance is questionable, the Osceola County Road Commission shall require an engineering study to be completed by a person or firm certified to perform sight distance studies. The study will determine whether or not the driveway for which a permit is being applied for meets safe sight distance requirements. The cost of an engineering study required shall be borne by the person or persons making application. If safe sight distance conditions can't be met then the permit shall be denied.
- 2) A driveway radius shall be located entirely within the permittee's property lines. A driveway radius may be extended outside of that area only if the adjoining property owner gives written permission.
- 3) If a driveway is to be located adjacent to a highway intersection, the starting curve of the radius shall be no less than 100' from the centerline of the highway intersection.
- 4) The driveway shall be so constructed that no water will drain onto the county highway. The Road Commission shall determine whether a drainage structure is required for any driveway installation, as well as the diameter and length of structure. A minimum slope of 1 on 4 (1 ft vertical-4 ft. horizontal) is required for embankments on driveway culvert fill areas. (Minimum diameter for drive culverts is 15 inches and minimum length is 30 feet).
- 5) Driveway surface shall be 4 inches minimum of stabilized, processed gravel from traveled roadway to right-of-way line.
- 6) Conditions and limitations:
  - A) The Osceola County Road Commission reserves the right of inspection by its authorized representatives of a driveway covered by this permit. The permittee shall reimburse the Osceola County Road Commission for on the job inspection when deemed necessary by the Osceola County Road Commission.
  - B) The permittee shall surrender the permit and all rights thereunder, when notified to do so by the Osceola County Road Commission, because of default of any provision of the permit. A new permit may be issued if conditions are met.
  - C) Permit holder shall not cause excess materials or spoils to be placed in the highway right of way unless authorized to do so by an Osceola County Road Commission representative.
  - D) Permittee shall take, provide, and maintain necessary precautions to prevent injury or damage to persons and property from operations covered by this permit, and shall use warnings signs, which are in accordance with the current Michigan Manual of Uniform Traffic Control Devices.
  - E) A permittee shall save harmless the Osceola County Road Commission against any claim for damages arising from his/her negligence or his/her contractor's negligence in operations covered by this permit.
  - F) The property owner or his agent shall maintain driveways set forth in the permit.
